Ocean Kafle

Atlanta, GA • 972-251-9631 • oceankafle@gmail.com • github.com/oceankafle • Secret Clearance

EDUCATION

Georgia Institute of Technology, Atlanta, GA *August 2023 - December 2026 (Expected)*
Bachelor of Science, Computer Science *GPA: 3.8/4.0*
Concentrations: Artificial Intelligence & Human-Centered Computing
Relevant Coursework: Data Structures & Algorithms, Artificial Intelligence, Machine Learning, Probability & Statistics

PROFESSIONAL EXPERIENCE

Goldman Sachs, Dallas, TX *June 2026 - August 2026*
Engineering Summer Analyst

- Enhanced Goldman Sachs Marquee Atlas with AI-driven scenario generation across 5 asset classes for market risk analysis.
- Built an AI-powered TypeScript interface translating clients' natural-language requests into structured market scenarios.
- Partnered with Strats on quant requirements and built randomized Playwright tests to validate market analysis workflows.

Lockheed Martin, Grand Prairie, TX *May 2025 - August 2025*
Software Engineer Intern

- Built a GitLab CI/CD pipeline to automate releases for flight-critical embedded FPGA software, cutting delivery time by 25%.
- Integrated Docker runners and caching to improve build reproducibility, scalability, and parallel execution.
- Increased test coverage by 45% by implementing GoogleTest with CMake for consistent Windows/Linux testing.

Lockheed Martin, Grand Prairie, TX *May 2024 - December 2024*
Test Engineer Intern

- Built C#/.NET application for asset lifecycle, status tracking, and calibration workflows used across teams.
- Migrated analytics systems to PostgreSQL, optimizing schemas and indexes to improve performance by 20%.
- Designed Python + SQL data pipelines to process 1M+ time-series sensor records, increasing throughput by 35%.
- Developed validation scripts and regression tests that cut anomaly-detection time by 40% through earlier checks.

PROJECTS

ARGUS: AI-Powered Sensor Deployment | Full-Stack Developer *January 2026 - May 2026*

- Built an agentic LLM/VLM system translating natural-language goals/floor plans into end-to-end sensor deployment plans.
- Integrated Azure OpenAI models with structured prompts for activity analysis, sensor selection, and spatial reasoning.
- Developed a 3-stage reasoning pipeline generating deployment plans in 2–5 seconds with ~80–90% estimated coverage.

Knowledge-Based ARC-AGI Solver | AI Research Project *August 2025 - December 2025*

- Developed a symbolic AI system using rule search and object-level transformations for abstract reasoning.
- Evaluated the system on 400 ARC-AGI tasks, achieving a 3× improvement over heuristic baselines with ~15% partial correctness, and documented results and limitations in a final paper and poster.

LEADERSHIP & COMMUNITY INVOLVEMENT

Equity Research Team Lead *August 2024 - May 2026*
Georgia Tech | Financial Services–Sponsored Research Program

- Built financial models forecasting 5+ years of cash flows for public equities incl. GOOGL and Carnival.
- Performed DCF valuation logic incorporating market risk, beta, and target multiples to compute intrinsic values.
- Synthesized analyses into concise investment deliverables for technical and non-technical stakeholders.

Director of Community Growth *August 2024 - Present*
Georgia Tech | Startup Exchange

- Expanded founder network by 20% through targeted outreach and coordinating events including OpenAI and Y Combinator.
- Developed community programs, including demo days and founder spotlights, securing 5+ strategic partnerships.
- Launched a women's mentorship program connecting 25 aspiring entrepreneurs with experienced female startup founders.

SKILLS

Languages: Python, Java, C++, C#, TypeScript, JavaScript, SQL
Frameworks & Technologies: Angular, REST APIs, Docker, GitLab CI/CD, Playwright, Azure OpenAI
Tools & Data: Git, Linux, PostgreSQL, GoogleTest, CMake, AG Grid, Tableau, Jira, Excel
